

MERN Stack Developer CV

Professional Summary

Full-stack MERN developer building end-to-end web applications. Experienced with MongoDB, Express, React, and Node.js, capable of handling both frontend and backend development.

Skills

- MongoDB
- Express
- React
- Node.js (MERN stack)
- Redux
- Context API
- REST APIs & GraphQL
- Docker
- Git
- Deployment (Heroku, AWS)
- Unit & integration testing

Experience

- Full-Stack Developer | StartUp Labs | Cairo, Egypt | Jan 2022 – Present
 - Developed full-stack apps with MERN stack for clients, handling 1000+ concurrent users.
 - Implemented Redux for state management and API integrations.
 - Deployed apps on AWS EC2 and configured CI/CD pipelines.
- Web Developer Intern | InnovateTech | Jun 2021 – Dec 2021
 - Built task manager app with React and Node.js backend.
 - Learned deployment and environment setup with Docker.

Projects

- Full MERN E-commerce: Products, carts, checkout, admin panel, Stripe integration.
- Chat App: Real-time messaging app with WebSocket support.
- Task Manager: CRUD tasks with authentication, project assignments, and deadlines.

Education

- BSc in Computer Engineering | Cairo University | 2021
