

Job Description – Full-Stack MERN Developer

Job Title: Full-Stack MERN Developer

Location: Cairo, Egypt (Remote/On-site)

Experience: 2–5 years

Responsibilities:

- Develop end-to-end web applications using MongoDB, Express, React, and Node.js.
- Build responsive and interactive frontend components with React and Redux.
- Design and implement backend services and APIs with Node.js and Express.
- Manage application state using Redux or Context API.
- Deploy and maintain applications on cloud platforms (AWS, Heroku).
- Ensure code quality with testing frameworks and best practices.

Required Skills:

- Expertise in MERN stack (MongoDB, Express, React, Node.js).
- Proficiency in Redux, Context API, and REST/GraphQL APIs.
- Experience with Docker, Git, and CI/CD deployment.
- Knowledge of unit and integration testing.
- Strong understanding of full-stack development and application architecture.

Preferred Qualifications:

- Bachelor's degree in Computer Engineering, Computer Science, or related field.
- Experience with e-commerce, chat apps, or task manager applications.
- Strong communication and teamwork skills.
