

Backend Developer CV

Professional Summary

Backend developer with 3 years' experience designing and maintaining RESTful APIs and server-side applications using Node.js and Express. Passionate about building scalable, secure, and efficient systems.

Skills

- Node.js
- Express.js
- REST APIs
- MongoDB
- PostgreSQL
- MySQL
- Authentication & Authorization (JWT, OAuth2)
- Docker
- Postman
- Git
- CI/CD pipelines
- Testing frameworks: Jest, Mocha

Experience

- Backend Developer | FinTech Solutions | Cairo, Egypt | Mar 2022 – Present
 - Developed REST APIs serving 10k+ daily requests.
 - Implemented JWT authentication and role-based access control.
 - Designed database schema and optimized queries to reduce latency by 25%.
- Backend Intern | TechNova | Jun 2021 – Feb 2022
 - Assisted in creating Node.js microservices.
 - Wrote automated unit and integration tests.

Projects

- REST API System: Node.js backend for an e-commerce platform supporting CRUD operations, authentication, and order tracking.

- Authentication Service: Secure login system with JWT tokens and password hashing.
- File Upload Service: Handles large file uploads with progress tracking and storage in AWS S3.

Education

- BSc in Computer Engineering | Cairo University | 2021
