

Job Description – Frontend Developer (React)

Job Title: Frontend Developer (React)

Location: Cairo, Egypt (Remote/On-site)

Experience: 2–4 years

Responsibilities:

- Develop responsive and interactive web applications using React, Redux, and modern JavaScript (ES6+).
- Collaborate with designers to create pixel-perfect UI/UX.
- Integrate RESTful APIs and ensure seamless data flow between frontend and backend.
- Optimize web performance for faster load times and smooth user experience.
- Write reusable components and maintain code quality using best practices.
- Participate in code reviews, debugging, and continuous improvement.

Required Skills:

- Strong proficiency in React, Redux, HTML5, CSS3, SCSS, Tailwind CSS.
- JavaScript (ES6+), TypeScript knowledge preferred.
- Experience with responsive design and cross-browser compatibility.
- Familiarity with REST API integration using Axios or Fetch.
- Version control using Git/GitHub.
- Experience with CI/CD pipelines and Jira is a plus.

Preferred Qualifications:

- Bachelor's degree in Computer Engineering, Computer Science, or related field.
- Previous experience building dashboards, e-commerce platforms, or portfolio websites.
- Strong problem-solving and teamwork skills.
